

Consecutive numbering is repeated on perforated tear-off receipts.

Strong instant-stick adhesive extends to the edge and reveals any attempts to open a bag.

An easy-release strip helps speed up sealing bags.

Details of sender and addressee, together with additional information, can easily be noted on a bag's marker-friendly surface.

A consecutively numbered bar code gives every bag a unique identity.

Indicators hidden in the security tape reveal any attempts to tamper a bag.

Solutions that you can rely on

Printing on the hard-wearing special seam reveals any attempts to reseal a bag.

# AMERSAFE

AmerSafe® security bags are manufactured from strong, multilayer coextruded film, which gives them excellent durability, reliability, and resistance to humidity – and light weight.

The innovative AmerSafe® products are designed to give you the security, durability, convenience, and quality you expect when transporting high-value items. AmerSafe® security bags are an ideal solution for storing and transporting money, documents, and valuables – whether you are a shop, a bank, a security or courier company, a hotel, or a hospital. They are also excellent for use at airports.

When using AmerSafe® bags, you do not need to ensure that bags are returned after use or check them during their journey. Once sealed and on its way, you can virtually forget about an AmerSafe® bag, knowing that it will reach its destination intact. Any attempt to break into an AmerSafe® bag can be seen instantly. Unauthorised opening and resealing simply cannot be hidden – thanks to a range of safety features.

## All the security you need

In addition to a range of standard sizes, AmerSafe® products can be manufactured according to customer specifications with flexoprinting in up to eight colours, together with a choice of transparent or black-and-white pigments and features such as a bottom gusset and different types of document pockets and stickers. You can also choose microperforation, which allows you to expel excess air before closing. For even more protection, custom bar codes and RFID tags are also available.

## Tape:

Perforated security tape ensures that users can easily detect if any attempt has been made to open a bag, by checking if the words “open” or “stop” are visible.

The environment is a priority across the AmerSafe® product family. Environmental and safety concerns are taken into account from the product development phase onwards. The aim is to create high-quality products with the minimum use of raw material, optimising prod-

uct protection properties, and reusing production rejects. AmerSafe® security bags can be recycled after use as recycled products or used in energy generation.
